

Mailsort Online – Website

Online processing fees as at 1 March 2018

Pay-as-you-go*		
	Fee per 1000 records	Minimum Fee
Mailsort HighSort	£0.50	£20.00
Mailsort LowSort (OCR)	£0.50	£20.00
Unsorted with Mailmark barcode text strings, DPS & eMHS upload	£0.65	£20.00
Mailsort LowSort with Mailmark barcode text strings, DPS & eMHS upload	£0.65	£25.00
+ Optional Mailmark barcode image files addition (png, jpg or gif)		£5.00
+ Optional label sheets with barcodes (requires barcode images)		£5.00

Annual Account with unlimited usage**	
	Annual Fee
Mailsort HighSort & LowSort OCR Only	£325.00
Mailsort HighSort, LowSort OCR plus Mailmark, DPS & eMHS upload	£550.00
+ Optional Mailmark barcode image files addition (png, jpg or gif)	£100.00

NB!

VAT will be added to all prices shown.

*Pre-processing is FREE, and includes delivery of actual Computer Planning report and 200 record sample of the mailsorted address data file. Payment is required via PayPal, Debit or Credit card prior to delivery of the Line Listing report and complete data sets. A pdf VAT invoice/receipt is supplied for download immediately after payment. Under certain conditions we may allow payment by normal invoice.

Pay-as-you-go examples:

Mailsort HighSort of 39,000 addresses: $(39,000 \times £0.50)/1000 = £19.50$. This is below our minimum fee of £20.00, so the applied fee is £20.00.
 Mailsort LowSort of 41,000 addresses: $(41,000 \times £0.50)/1000 = £20.50$. This is above our minimum fee of £20.00, so the applied fee is £20.50.
 Mailmark LowSort of 51,000 addresses: $(41,000 \times £0.65)/1000 = £26.65$. This is above our minimum fee of £25.00, so the applied fee is £26.65.
 In the above example, if the optional barcode images were selected, this would incur an additional fee of £5.00, making the total fee £31.65.

**An Annual Account agreement allows unlimited usage of the services ordered, but within the limits of fair usage. Where we, at our discretion, deem usage to be not fair or excessive we reserve the right to terminate the agreement. There are also technical limits to the file sizes that can be processed via the website. In such cases we point to using our desktop system instead.

Annual Account fees are payable annually (price is guaranteed to stay the same for at least two years)

Total cost for both modules without barcode image option	£1,180.00	£955.00
Total cost for both modules with barcode image option	£1,360.00	£955.00

NB!

Annual Licence Fees apply after the twelve months and will be invoiced annually until cancelled.

* The Mailmark/DPS addition to the mailsort processor enables you to add a DPS code to your address data. This requires the PIF database, supplied by the Royal Mail (licence can be obtained here: www.poweredbypaf.com). Without this licence, the system can only process data for Mailmark which already includes DPS codes (the full 2D barcode strings generated are based on Postcodes and DPS codes).

** In order to use Mailmark and manage eManifests, you must have a Royal Mail eMHS poster upload account with Participant ID. If you use the UKMail variant, you must have UKMail eManifest account as well as the eMHS account.

*** If you have an alternative method of generating barcodes from the barcode strings, you do not need this option.

VAT will be added to all prices shown. See also Terms & Conditions on: <http://www.mailsortonline.com/sections/help/terms.aspx>
